## Installation & Setup

### 1. Access the Theme:

- In your HubSpot account, go to the **Design Manager**.
- Select the **THP Theme** from the list of available themes.

### 2. Apply a Template:

- Go to the **Website Pages** section.
- Create a new page and choose from one of the pre-built **THP Templates**.

### 3. Customize Your Page:

- Once your template is applied, you can start adding and customizing modules to suit your needs.

## Theme Structure

The **THP Theme** includes the following folder structure in the HubSpot **Design Manager**:

**THP\_theme/**

**CSS:**

- Main CSS
- Custom CSS
- Theme Overrides CSS
- Template Pages CSS
- Template Blog list CSS
- Font CSS
- jQuery UI CSS
- Magnific popup.min CSS
- Slick CSS

**JS:**

- jQuery UI Js
- Magnific popup.min Js

- Main Js
- Mixitup.min Js
- Slick Js

### **Images:**

### **Modules:**

- Header Logo
- Header Menu
- Mobile Menu
- Social Links
- Header Slider
- Heading with Underline
- Breadcrumb
- Header Banner
- Footer Area

### **System:**

- 404.html
- 500.html

### **Templates:**

- **Layouts -**
  - a. base.html
- **Partials:**
  - a. Header.html
  - b. Footer.html
  - c. Header-no-navigation.html
  - d. Footer-no-navigation.html
- **System:**
  - a. 404.html
  - b. 500.html
  - c. Search\_result.html
  - d. Password\_prompt.html

- I. Blog\_Details.html
- J. Blog List.html
- K. Siitemap.html
- **CSS Folder:** Contains the global stylesheet **theme-overrides.css** for custom styling.
- **JS Folder:** Contains **main.js** for custom JavaScript functionalities.
- **Modules Folder:** Contains all custom modules like Header banners, Leadership Slider, and more.
- **Fonts Folder:** Contains custom font definitions in **fonts.css**.
- **Templates Folder:** Includes the default templates for home, about, and contact pages.

## Custom Modules

The **THP Theme** provides a variety of custom modules. Here is a breakdown of each one:

### 1. Header Logo Module

- **Description:** The **Header Logo Module** allows you to upload and display your company logo in the website header for consistent branding across all pages.
- **Fields:**
  - a. **Logo Image:** Upload your logo in image format (e.g., PNG, JPEG, SVG).
  - b. **Alt Text:** Add alt text for accessibility and SEO purposes.
  - c. **Link URL:** Set the URL to link the logo (usually to the homepage).
  - d. **Logo Size:** Customize the dimensions of the logo for proper scaling.
- **Usage:** Place the **Header Logo Module** in your site's header section to display your company logo and link it to relevant pages (typically the homepage).

**Logo Image:**

## 2. Header Menu Module

- **Description:** The **Header Menu Module** enables users to display a dynamic, multi-level navigation menu in the header for easy access to key pages.
- **Fields:**
  - Menu Selection:** Choose a pre-defined HubSpot menu or create a custom one.
  - Menu Alignment:** Adjust the alignment (left, center, right) of the menu items.
  - Dropdown Styling:** Customize the appearance of dropdowns for submenus.
  - Mobile Menu Settings:** Configure how the menu behaves and appears on mobile devices.
- **Usage:** Place the **Header Menu Module** in your site's header section to display a fully customizable, responsive navigation menu, ensuring easy navigation across all pages.

**Menu image:**

## 3. Mobile Menu Module

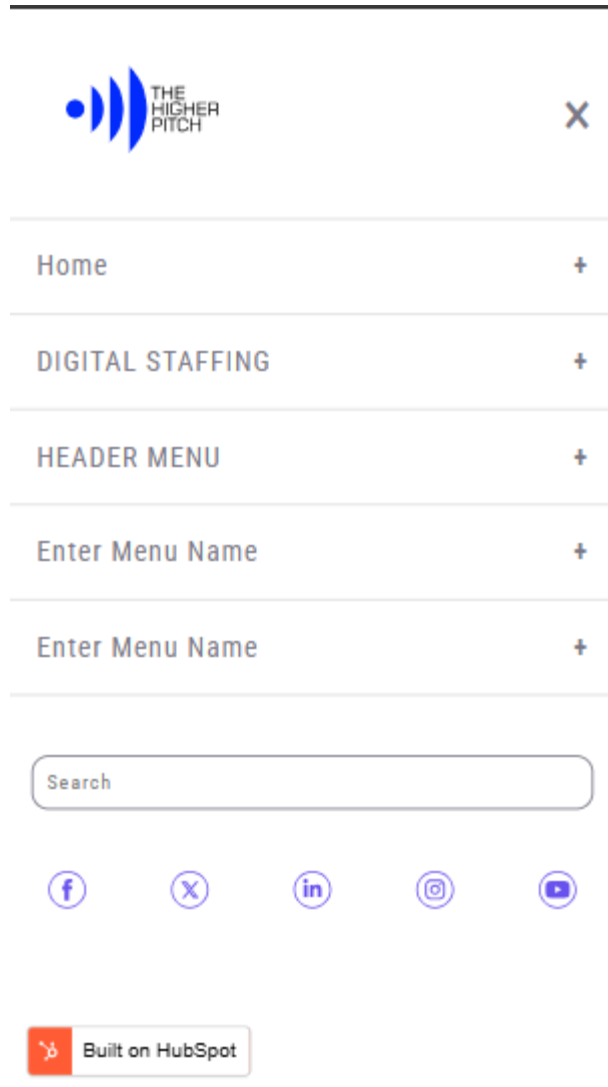

- **Description:** The **Mobile Menu Module** creates a full-screen navigation overlay optimized for mobile devices, featuring a customizable menu list with an accordion-style dropdown for submenus.
- **Fields:**
  - Menu List:** Select or create the primary menu items to be displayed.
  - Accordion Submenus:** Enable accordion functionality for submenus to expand or collapse.
  - Background Color:** Set the background color of the full-screen navigation overlay.

- d. **Overlay Animation:** Choose the animation style for how the menu appears (fade, slide, etc.).
- e. **Close Button Icon:** Upload an icon for closing the overlay.
- f. **Menu Text Styling:** Customize font size, color, and hover effects for menu items.
- **Usage:** Add the **Mobile Menu Module** to your website to create a seamless full-screen navigation overlay on mobile. Users can click on main menu items to expand accordion-style submenus, improving navigation on mobile devices. This module is ideal for enhancing user experience with visually appealing, space-saving navigation on smaller screens.

**Mobile Menu image:**

---

#### 4. Social Links Module

- **Description:** The **Social Links Module** allows you to display a set of social media icons that link to your company's social profiles, providing easy access to your online presence across platforms.
- **Fields:**
  - a. **Social Platform Links:** Add URLs for each social media profile (e.g., Facebook, Twitter, LinkedIn, Instagram).
  - b. **Social Icons:** Upload custom icons or select from predefined social media icons.
  - c. **Icon Size:** Set the size of the icons to fit your design.

- d. **Icon Style:** Choose between several styles (round, square, colored, monochrome).
- e. **Hover Effect:** Add hover effects to icons (e.g., color change, zoom).
- f. **Alignment:** Adjust the alignment (left, center, right) of the icons.
- **Usage:** Place the **Social Links Module** in the footer, header, or sidebar of your website to provide users with direct links to your social media profiles. This module ensures that visitors can easily connect with your brand on various platforms.

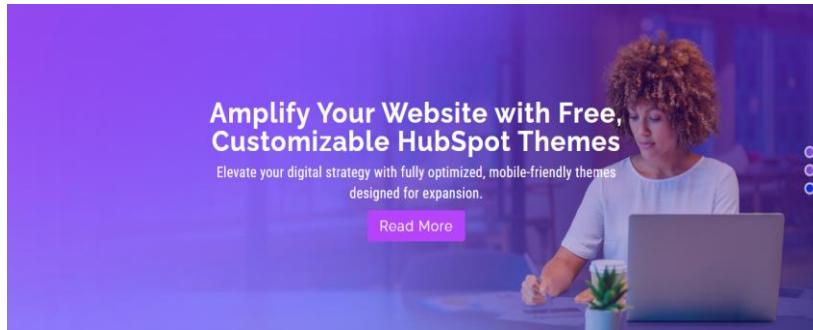

**Social media image:**

## 5. Header Slider Module

- **Description:** The **Header Slider Module** creates an interactive and visually appealing banner slider for the website header, featuring multiple slides with customizable content. This module uses a slick slider with a smooth fade-in design for transitioning between slides.
- **Fields:**
  - a. **Slides:** Add multiple slides with options for image or video backgrounds.
  - b. **Slide Heading:** Enter the main heading text for each slide.
  - c. **Slide Subheading:** Add a subheading for additional context.
  - d. **Call-to-Action (CTA) Button:** Configure a clickable button with custom text and a link for each slide.
  - e. **Fade-in Effect:** Enable the slick slider fade-in transition effect between slides.
  - f. **Autoplay Settings:** Configure the autoplay speed, slide duration, and looping behavior.
  - g. **Navigation Custom Dots:** Enable or disable navigation dots for manual slide control.
- **Usage:** Use the **Header Slider Module** to display eye-catching banners with fade-in transitions for enhanced user engagement. Place it in the header section to create a dynamic first impression with rotating slides, highlighting key messages, promotions, or features. Perfect for displaying multiple content pieces with smooth, modern transitions.

**Slider Image:**

## 6. Heading with Underline Module

- **Description:** The **Heading with Underline Module** displays a customizable page title with an elegant underline design, featuring a half-border below the heading to enhance visual emphasis and create a stylish title section.
- **Fields:**
  - a. **Heading Text:** Enter the main heading or page title.
  - b. **Heading Level:** Select the HTML tag for the heading (e.g., H1, H2, H3).
  - c. **Underline Style:** Customize the half-border underline, including color, thickness, and width.
  - d. **Text Alignment:** Choose alignment options (left, center, right).
  - e. **Font Style:** Customize the font type, size, and weight for the heading.
  - f. **Spacing:** Adjust the margin or padding above and below the heading for better spacing control.
- **Usage:** Place the **Heading with Underline Module** at the top of any page to create an eye-catching title section. The underline adds a sleek, modern touch, making it ideal for page titles, section headers, or any text that requires emphasis.

**Image:**

## 7. Breadcrumb Module

- **Description:** The **Breadcrumb Module** provides a navigational trail that helps users understand their current location within the site's hierarchy and easily navigate back to previous pages.

- **Fields:**
  - a. **Home Link Text:** Customize the label for the homepage link (e.g., "Home").
  - b. **Separator:** Choose the symbol or character to separate breadcrumb links (e.g., ">", "/", "|").
  - c. **Text Styling:** Customize the font size, color, and style for breadcrumb text.
  - d. **Active Page Styling:** Set styles for the current/active page in the breadcrumb trail.
  - e. **Link Behavior:** Option to open links in a new tab or the same window.
- **Usage:** Add the **Breadcrumb Module** to any page template to enhance navigation. It helps users track their journey through the site, improving user experience and SEO by providing a clear site structure. This module is especially useful for content-heavy websites or multi-level navigation systems.

**Image:**

Home » [About Us](#)

## 8. Header Banner Module

- **Description:** A customizable banner for adding large background images or videos with prominent text.
- **Fields:**
  - a. Background Image/Video
  - b. Heading
  - c. Subheading
  - d. Call-to-Action (CTA) button
- **Usage:** Drag and drop this module to create engaging hero sections.

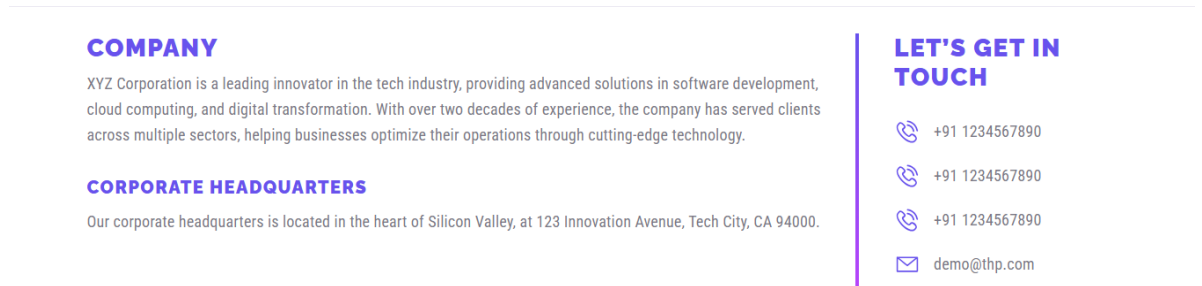

**Image:**

## 9. Footer Area Module

- **Description:** The **Footer Area Module** creates a customizable footer with a two-column layout, where the left section (70%) features company and headquarters overviews, and the right section (30%) displays key contact details such as fax, phone number, and email address.
- **Fields:**
  - a. Left Section:**
    - **Company Overview:** Enter a brief description or overview of the company.
    - **Headquarters Overview:** Include details like the company's location, address, or headquarters summary.
  - b. Right Section**
    - **Fax Number:** Input the company's fax number.
    - **Contact Number:** Add the company's main contact number.
    - **Email Address:** Provide a general or support email address.
- **Text Styling:** Customize fonts, colors, and sizes for both sections.
- **Background Color:** Set the background color for the footer.
- **Padding & Spacing:** Adjust spacing between sections and within content.
- **Usage:** Place the **Footer Area Module** at the bottom of any page to provide important company information and contact details in a clean, organized layout. The left section emphasizes the company's overview, while the right section offers quick access to contact information, improving accessibility and professionalism.

## Images:

## 10. Copyright Area Module

- **Description:** The **Copyright Area Module** is designed for the footer's end section, featuring a black background with copyright text, and links to the sitemap and privacy policy, providing legal and navigational information to users.
- **Fields:**
  - a. **Copyright Text:** Enter the copyright notice (e.g., "© 2024 [Company Name]").
  - b. **Sitemap Link:** Add a link to the sitemap page.
  - c. **Privacy Policy Link:** Add a link to the privacy policy page.
  - d. **Background Color:** Set the background color (default: black).
  - e. **Text Color:** Customize the text color for readability against the background.
  - f. **Link Styling:** Style the sitemap and privacy policy links (hover effects, font size, color).
  - g. **Alignment:** Adjust the alignment of text and links (left, center, right).
- **Usage:** Add the **Copyright Area Module** to the very bottom of the footer to display essential copyright information and provide links to important legal pages like the sitemap and privacy policy. It enhances professionalism while ensuring compliance with legal and privacy regulations.

## Images:

## 11. Get In Touch Form Module

- **Description:** The **Get in Touch Form Module** allows users to easily submit inquiries or contact requests via a customizable form. It's designed to capture essential contact details and messages from visitors looking to reach your business.
- **Fields:**
  - a. **From Title:** Enter the heading text for the form (e.g., "Get in Touch")
  - b. **Form Description:** Add a brief description or instructions for the form (optional).
  - c. **Form Fields:**
    - **Name:** Capture the user's full name.
    - **Email:** Capture the user's email address.
    - **Phone Number:** Capture the user's phone number (optional).
    - **Message:** Add a text area for the user to write their message or inquiry.
    - **Company:** Capture the Company information.
    - **Custom Fields:** Add any additional fields as needed (e.g., dropdowns, checkboxes).
  - d. **Submit Button Text:** Customize the text for the submit button (e.g., "Send Message").
  - e. **Thank You Message:** Set a custom message to display after form submission.
  - f. **Form Styling:** Customize fonts, colors, and field sizes to match the design of your site.
  - g. **Email Notification:** Configure where form submissions will be sent (e.g., admin email).
- **Usage:** Place the **Get in Touch Form Module** on contact pages or landing pages to allow visitors to easily send inquiries. This module improves user engagement and helps gather leads or customer queries, streamlining communication between visitors and your business.

## 12. Overview Section Module

- **Description:** The **Overview Section Module** features a split layout with an animated image on the left and a company overview on the right, along with the company logo, creating an engaging introduction section for your website.
- **Fields:**
  - a. **Left Side Animation:**
    - **Animated Image:** Upload or select an animated in multiple images (e.g., Png, jpeg) to display on the left side.
    - **Animation Settings:** Customize animation speed, loop, and trigger settings (e.g., on scroll).
  - b. **Right Side Overview:**
    - **Company Logo:** Upload the company logo to display alongside the text.
    - **Company Overview Text:** Enter a brief description or overview of the company.
    - **Text Styling:** Customize font size, color, and alignment of the overview text.
    - **Background Color:** Set the background color for the module.
    - **Spacing:** Adjust the padding and margin to fine-tune the layout.
- **Usage:** Use the **Overview Section Module** to introduce your company on key pages, such as the homepage or about page. The animated image draws attention, while the right section provides valuable information, enhancing user engagement and effectively communicating your brand identity.

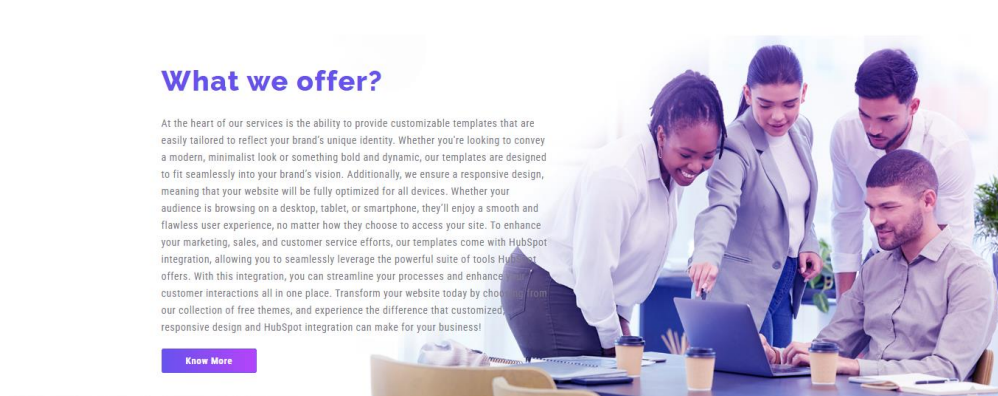

### Images:

### 13. Introduction Section Module

- **Description:** The **Introduction Section Module** provides a visually striking introduction area with a customizable background image, overlaid with a title, paragraph, and a call-to-action (CTA) button, ideal for highlighting key messages or promotions.
- **Fields:**
  - a. **Background Image:** Upload or select a background image that can be easily updated to suit the content.
  - b. **Title:** Add a main heading to grab attention.
  - c. **Paragraph Text:** Enter descriptive text or a brief introduction under the title.
  - d. **CTA Button:** Configure a button with custom text and a link (e.g., “Read More”).
  - e. **Text Styling:** Customize fonts, colors, and sizes for the title and paragraph.
  - f. **Button Styling:** Adjust button color, size, hover effect, and alignment.
  - g. **Overlay Settings:** Option to add an overlay color or gradient on the background image for better text readability.
  - h. **Spacing:** Adjust padding and margin for proper layout balance.
- **Usage:** Use the **Introduction Section Module** at the top of landing pages or as a prominent section to introduce your content, services, or products. The customizable background image and CTA button make it versatile for various marketing messages, enhancing visual appeal and driving user interaction.

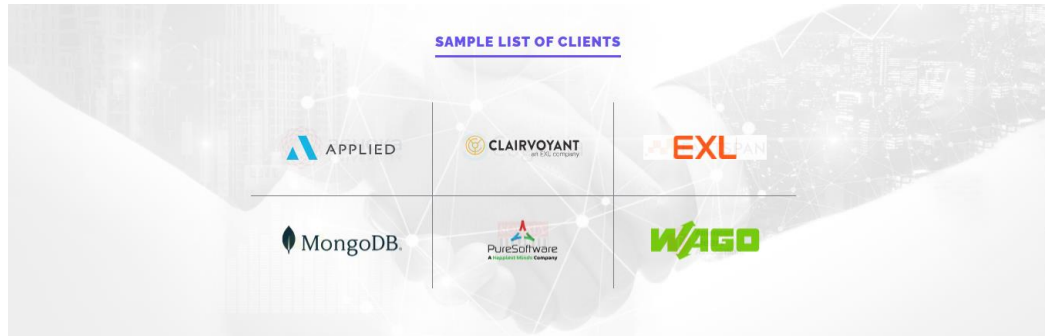

#### Images:

## 14. Simple Content Module

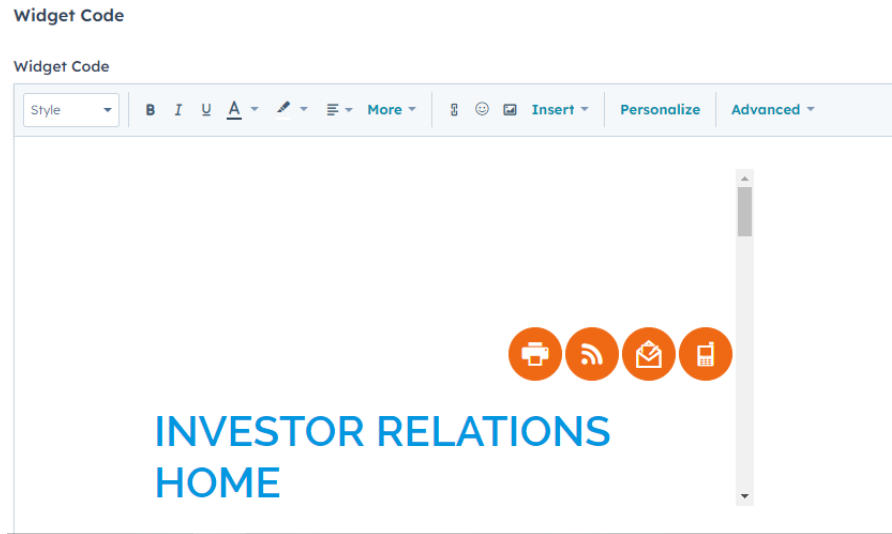

- **Description:** The **Simple Content Module** is designed to showcase a section with a background image, featuring a row of client logos displayed in a bordered area. The logos appear three at a time, with a smooth fade slide animation powered by JavaScript.
- **Fields:**
  - a. **Background Image:** Upload or select a background image for the section.
  - b. **Client Logos:** Upload multiple client logos to be displayed in the section.
  - c. **Logo Display Settings:** Configure how many logos appear per row (default: three).
  - d. **Border Style:** Customize the border around the logo section, including color and thickness.
  - e. **Animation Settings:** Enable JavaScript fade slide animation for transitioning logos.
  - f. **Logo Size and Spacing:** Adjust the size of logos and spacing between them.
  - g. **Autoplay Speed:** Set the speed of the animation and logo transitions.
- **Usage:** Use the **Simple Content Module** to display client or partner logos attractively on your website. The animation enhances visual engagement, and the bordered layout adds a professional touch. It is perfect for highlighting brand associations, displaying partnerships, or demonstrating credibility through client logos.

### **Images:**

## 15. Widget Snippet Module

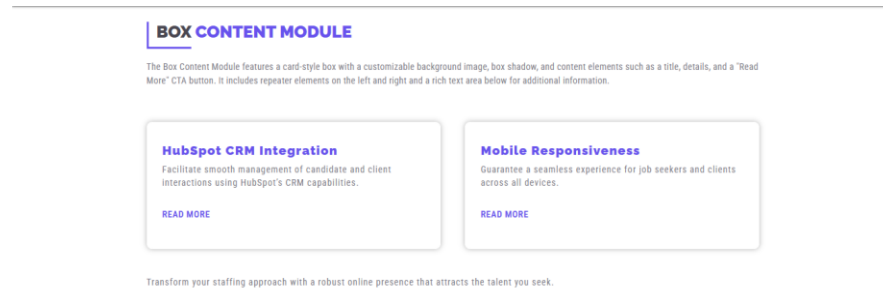

- **Description:** The **Widget Snippet Module** provides a flexible rich text area that allows users to easily add, format, and modify content, giving complete control over the design layout. This module is ideal for displaying customizable text, images, and other content elements within a page.
  - **Fields:**
    - a. **Rich Text Editor:** A powerful editor for adding and formatting text, images, links, and lists.
    - b. **Custom Styling Options:** Controls for adjusting font size, color, alignment, and other style elements directly within the editor.
    - c. **Layout Settings:** Options to modify the design layout, such as padding, margin, and text alignment.
    - d. **HTML Code Block:** Allows users to add custom HTML or embed code snippets for advanced content customization.
    - e. **Background Settings:** Choose a background color or image for the widget area.
    - f. **Content Spacing:** Adjust spacing around the text and other content elements. `[OBJ]`
  - **Usage:** The **Widget Snippet Module** is perfect for creating dynamic and flexible content areas within your website. Use it to add rich text content, promotional messages, or any custom layout that needs frequent updates. The module's rich text editor makes it easy for non-technical users to format and style their content without coding, enhancing the site's usability and design adaptability.
- Images:**

## 16. Box Content Module

- **Description:** The **Box Content Module** features a card-style box with a customizable background image, box shadow, and content elements such as a title, details, and a "Read More" CTA button. It includes repeater elements on the left and right and a rich text area below for additional information.
- **Fields:**
  - a. **Background Image:** Upload or select a background image for the card box, easily updateable by users.
  - b. **Box Title:** Enter the main title or name for the box content.
  - c. **Details:** Add a brief description or details inside the box.
  - d. **CTA Button:** Configure the "Read More" button with custom text and link settings.
  - e. **Box Shadow:** Customize the shadow effect for the box to add depth and emphasis.
  - f. **Repeater Element:** Add items to the left and right of the box, such as icons, images, or additional text.
  - g. **Rich Text Area:** Provide more information below the box with a rich text editor, allowing detailed content with custom styling.
  - h. **Styling Options:** Adjust the font, colors, and spacing for the text and button to match the overall design.

### **Images:**

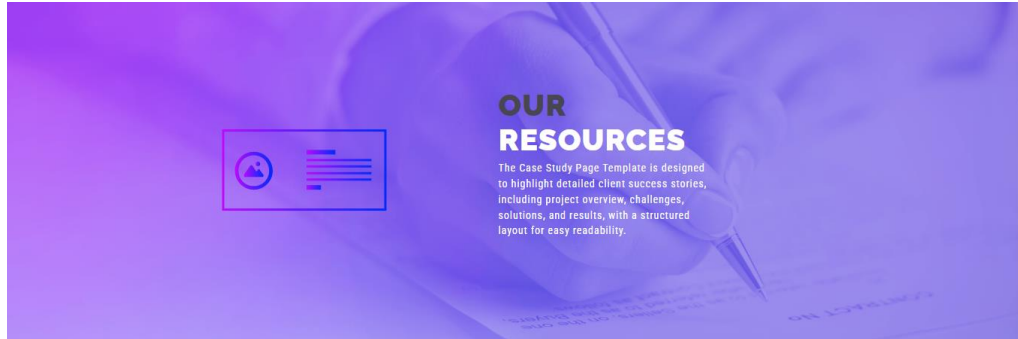

- **Usage:** Use the **Box Content Module** to highlight key information in an engaging, card-style format. The background image and repeater elements add visual appeal, while the rich text area provides space for additional details. Ideal for showcasing services, products, or key content sections that need to stand out on your website.

## 17. Case study Banner Module

- **Description:** The **Case Study Banner Module** is designed to create a visually appealing banner section with a customizable background image, an icon, a heading, and a descriptive paragraph. This module is perfect for highlighting case studies or key content areas.
- **Fields:**
  - Background Image:** Upload or select a background image for the banner, easily updatable by the user.
  - Icon Image:** Add an icon image that visually represents the content or theme of the banner.
  - Banner Heading Text:** Enter the main heading text for the banner.
  - Banner Paragraph:** Provide descriptive text or additional information below the heading.
  - Text Styling:** Customize font size, color, and alignment for both heading and paragraph text.
  - Icon Positioning:** Adjust the position of the icon relative to the text (e.g., left, right).
  - Overlay Settings:** Add an overlay to the background image for enhanced readability of text.
  - Spacing and Alignment:** Control the padding, margins, and alignment of all elements within the banner.
- **Usage:** Use the **Case Study Banner Module** at the top of case study pages or any content section that needs an impactful introduction. The customizable

elements allow you to tailor the banner to match your branding while clearly communicating the focus of the content, enhancing both visual appeal and user engagement.

**Images:**

## 18. Culture Slider Module

- **Description:** The **Culture Slider Module** is a dynamic slider that displays individual slides with customizable background images, banner headings, and testimonials with icons. Built using a single-item Slick slider, this module includes customizable navigation dots for an engaging and visually appealing display.
- **Fields:**
  - a. **Background Image:** Upload or select background images for each slide, easily updatable by the user.
  - b. **Banner Heading:** Add a heading text to overlay on each slide, highlighting key messages or themes.
  - c. **Testimonial Text:** Input the testimonial content that will be displayed over the image.
  - d. **Testimonial Icon:** Add an icon (e.g., quotes) to accompany the testimonial for a visually distinct style.
  - e. **Navigation Dots:** Customize the appearance, color, and style of the slider navigation dots.
  - f. **Slide Transition Settings:** Control slide transition speed, autoplay settings, and fade effects.
  - g. **Text Styling:** Customize font size, color, and positioning of the heading and testimonial text.

- h. **Overlay Settings:** Add an overlay or gradient to the background images to enhance text readability.
- **Usage:** Use the **Culture Slider Module** on pages to highlight company culture, customer testimonials, or key messages. The easy-to-update images and stylish navigation dots make it a versatile addition to any webpage, enhancing visual storytelling and user engagement.

**Images:**

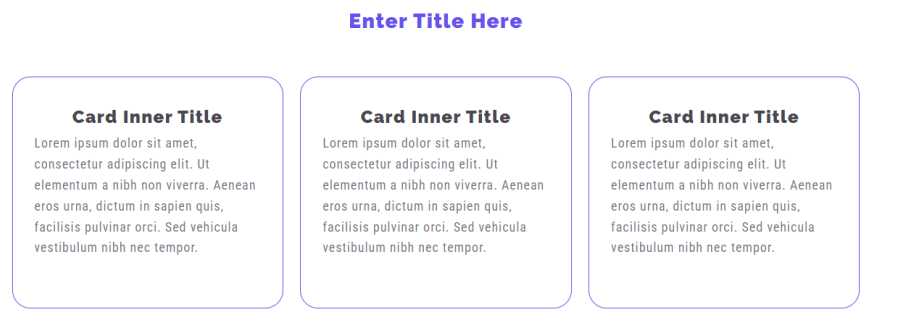

## 19. Card List Module

- **Description:** The **Card List Module** is designed to display content in a structured format with a main heading and a descriptive paragraph followed by multiple cards arranged in a grid layout. Each card features a heading, a descriptive paragraph, and a rounded border design, making it ideal for showcasing services, products, or features.
- **Fields:**
  - a. **Section Heading:** Add a main heading for the section.
  - b. **Section Paragraph:** Enter descriptive text that appears below the section heading.
  - c. **Cards (Repeater Mode):**
    - **Card Heading:** Add a title for each card.
    - **Card Information Paragraph:** Enter descriptive text for each card to provide details or insights.
    - **Border Radius:** Adjust the border radius to create rounded edges for the cards.
  - d. **Grid Settings:** Configure the number of cards per row (default is three cards per row).

- e. **Styling Options:** Customize fonts, colors, and spacing for both the section and individual cards.
- f. **Spacing and Alignment:** Adjust the padding and margin settings for the section and cards.
- **Usage:** Use the **Card List Module** to present multiple pieces of information in a clean and organized layout. This module is ideal for displaying key features, team members, services, or any grouped content that benefits from a visually appealing card format. The repeater function allows for easy addition of cards, making content management straightforward and adaptable.

**Images:**

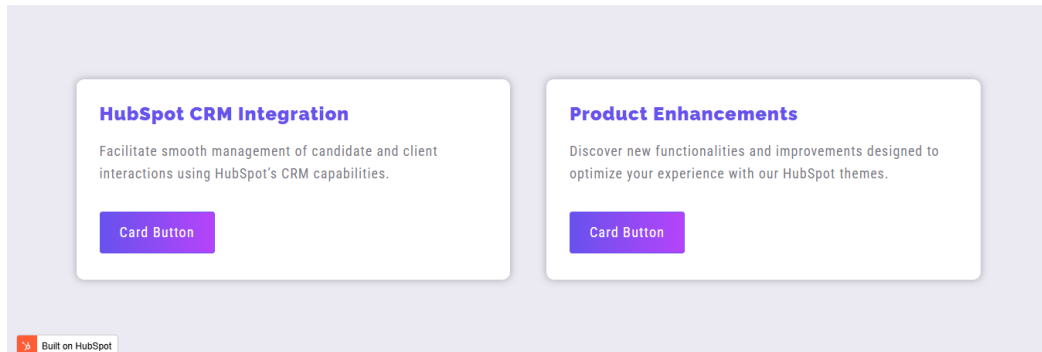

## 20. Card with Image Module

- **Description:** The **Card with Image Module** displays cards in a repeater mode on either the left or right side of the page. Each card features an updatable background image, a heading, a description, and a CTA button that links to another page, providing a visually engaging way to present content.
- **Fields:**
  - a. **Repeater Mode:** Add multiple cards that can be displayed on the left and right sides of the page.
  - b. **Background Image:** Upload or select a background image for each card, easily updated by the user.
  - c. **Card Heading:** Add a main heading for the card to capture attention.
  - d. **Card Description:** Enter descriptive text to provide additional information about the card's content.
  - e. **CTA Button:** Configure the button with custom text and a link to navigate to another page.
  - f. **Button Styling:** Customize the appearance of the CTA button, including color, size, and hover effects.

- g. **Text Styling:** Adjust fonts, colors, and alignment for the heading and description text.
- h. **Card Layout Settings:** Set the positioning of cards (left or right) and control spacing between them.
- **Usage:** Use the **Card with Image Module** to display content such as services, promotions, or team highlights in an interactive and visually appealing format. The easy-to-update background images and CTA buttons make it perfect for guiding users to specific pages, enhancing user experience, and driving engagement.

**Images:**

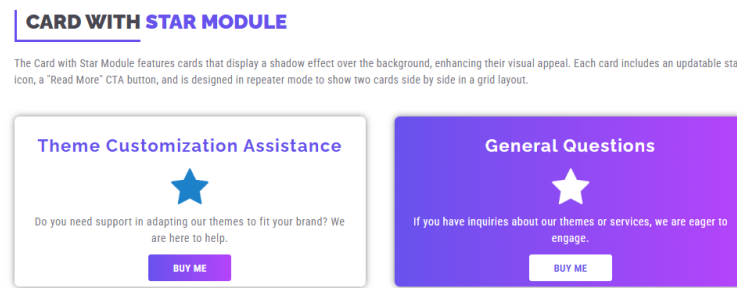

## 21. Card with Star Module

- **Description:** The **Card with Star Module** features cards that display a shadow effect over the background, enhancing their visual appeal. Each card includes an updatable star icon, a "Read More" CTA button, and is designed in repeater mode to show two cards side by side in a grid layout.
- **Fields:**
  - a. **Repeater Mode:** Add multiple cards that can be displayed in a grid format, showing two cards on the left and right sides.
  - b. **Card Shadow:** Enable and customize the shadow effect for the card to create a layered look.
  - c. **Star Icon:** Upload or select an icon to represent ratings or highlight key features, easily updateable by the user.
  - d. **Read More CTA Button:** Configure the button with custom text that links to additional content or details.
  - e. **Button Styling:** Customize the appearance of the "Read More" button, including color, size, and hover effects.
  - f. **Card Title:** Add an optional title for each card to provide context.

- g. **Card Description:** Include a brief description or information about the content of the card.
- h. **Spacing and Alignment:** Control the spacing between cards and overall alignment within the grid.
- **Usage:** Use the **Card with Star Module** to effectively display features, services, or testimonials in a visually appealing manner. The shadow effect and star icon provide an engaging design that draws attention, while the repeater mode allows for flexible content management, making it easy to present multiple pieces of information side by side. The "Read More" button encourages user interaction, directing visitors to further details or related content.

**Images:**

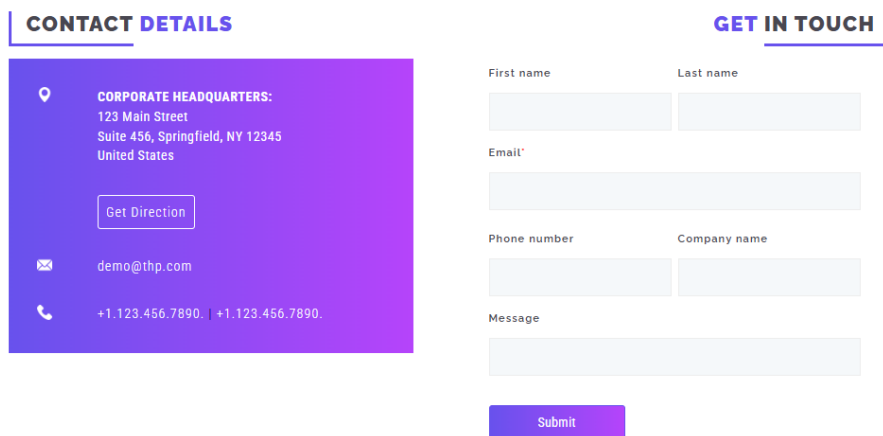

## 22. Contact Details Module

- **Description:** The **Contact Details Module** is designed for contact pages, featuring a two-column layout. The left side displays contact information with a heading, a background-colored card containing a map, email, and phone details. The right side includes a "Get in Touch" heading with a form for user inquiries.
- **Fields:**
  - a. **Left Section:**
    - **Contact Details Heading:** Add a heading for the contact information section.
    - **Background Color:** Set the background color for the contact details card.
    - **Map:** Embed a map showing the company location.
    - **Company Information:** Add fields for company address, email, and phone details.
  - b. **Right Section:**
    - **Get in Touch Heading:** Add a heading for the inquiry section.

- **Forms:** Integrate a form with fields like name, email, message, etc.
- c. **Text Styling:** Customize fonts, colors, and alignment for headings and contact details.
- d. **Card Layout Settings:** Adjust padding, border radius, and overall card design.
- **Usage:** Use the **Contact Details Module** on contact pages to provide essential company information and facilitate communication with users. The left section effectively displays location and contact methods, while the right section encourages users to reach out directly through the form, enhancing engagement and accessibility.

**Images:**

**23. Content Image Module**

- **Description:** The **Content Image Module** is designed to display content in a two-column grid layout with a customizable heading. The heading can be aligned left, right, or center. Below, the section features an image on one side and text (heading and paragraph) on the other, with flexible alignment options for a dynamic presentation.
- **Fields:**
  - a. **Section Heading:** Add a main heading for the section, which can be aligned left, right, or center.
  - b. **Grid Layout:** Set the overall layout of the section with a row containing two columns.
  - c. **Left Column (Image):**
    - **Image Upload:** Upload or select an image for the left column.

- **Image Alignment:** Position the image within the column (top, center, or bottom).
- d. **Right Column (Text):**
    - **Subheading:** Add a subheading for the right column content.
    - **Paragraph:** Enter the descriptive text or content for the right column.
    - **Text Alignment:** Choose text alignment options (left, right, or center).
  - e. **Column Layout Options:** Switch the order of the image and text (left to right or right to left).
  - f. **Styling Options:** Customize fonts, colors, spacing, and background options for both columns.
- **Usage:** Use the **Content Image Module** to create engaging content sections with text and imagery. Ideal for showcasing features, services, or stories, the module's flexible layout and alignment options allow for creative presentation, enhancing the page's overall aesthetic and user engagement.

Heading Here

#### Starting each mission, with all hands on deck.

We believe true teamwork happens when we embrace unique perspectives and personalities, and invite them to the table with equality. The foundation of all our initiatives rests on deep collaboration and inclusion of different individuals, regardless of gender, age, race, and orientations. Join us in this pursuit to move forward together!

## 24. Content Left Image Module

- **Description:** The **Content Left Image Module** displays content in a two-column grid layout with a left-side image and right-side text. The left column occupies 40% of the width with an image, while the right column includes a heading and a paragraph. The layout allows users to easily adjust the alignment and positioning of the text elements.
- **Fields:**
  - a. **Left Column (Image):**
    - **Image Upload:** Add an image for the left column, occupying 40% of the width.
    - **Image Alignment:** Adjust the positioning of the image within the column.
  - b. **Right Column (Text):**

- **Heading:** Add a heading for the text section.
  - **Paragraph:** Enter descriptive or informational text.
  - **Text Alignment:** Set the alignment of the text (left, center, or right) for flexibility in design.
- c. **Layout Settings:** Customize the spacing between the columns and adjust the layout order (left image, right text).
  - d. **Styling Options:** Modify fonts, colors, and padding for both the image and text areas.
- **Usage:** Use the **Content Left Image Module** to present content in a visually balanced layout, perfect for showcasing product features, company highlights, or any text and image combination. The module's flexible design allows for easy customization, making it adaptable to various content needs.

DIGITAL PROJECTS**

Save personnel and infrastructure costs by sourcing a skilled workforce overseas that aligns with your needs. Ensure your projects run without skipping a beat with our hand-picked offshore talent, who come with good aptitude, strong IT skills, rigorous training, and exceptional work etiquette. Our offshore talent agency helps you achieve greater organizational agility with on-demand, offshore staffing solutions. We provide you with cream offshore talent that undergoes meticulous screening before we deploy them on your projects.

Our global sourcing teams help find talented individuals across India by evaluating their skills, experience, business acumen, and the ability to work independently. Our proprietary screening and evaluation methods ensure top-notch IT professionals are hired for your IT programs.

**25. Content Snippet Module**

- **Description:** The **Content Snippet Module** allows users to create a grid layout with rich text HTML code areas. Each row displays four text boxes by default, which can be repeated as needed. This module is ideal for displaying snippets of content, code, or customizable text sections in a structured format.
- **Fields:**
  - a. **Rich Text HTML Area:** Add and edit HTML code or text in each snippet box.
  - b. **Repeater Mode:** Easily duplicate text boxes within the grid to extend the layout.
  - c. **Grid Layout Settings:** Set the number of items per row (default is four) and adjust spacing between them.

- d. **Text Box Styling:** Customize the appearance of each text box, including padding, borders, and background color.
  - e. **Content Alignment:** Control the alignment of text within each box (left, center, right).
  - f. **Custom CSS Class:** Add custom classes for further styling and customization.
- **Usage:** Use the **Content Snippet Module** to display multiple snippets of text or code within a structured grid. This is especially useful for sections that require detailed formatting or HTML input, such as testimonials, service descriptions, or highlighted content areas. The module's repeater functionality allows for easy expansion and management of content.

**Images:**

Enter Text Here

Content Info

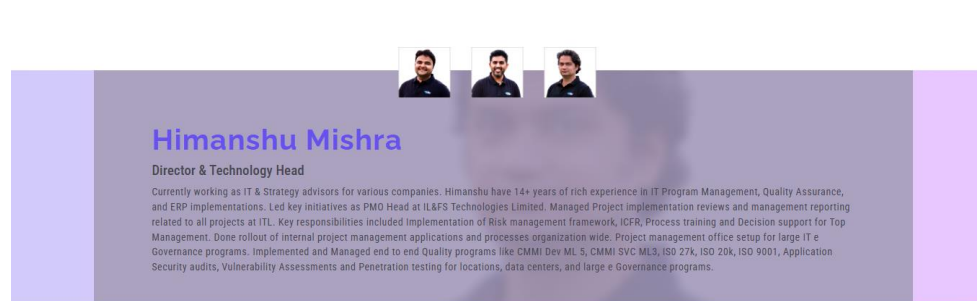

The image shows a content editor interface. At the top, there is a header labeled "Content Info". Below this is a toolbar with various icons for text formatting: Paragraph (dropdown), Bold (B), Italic (I), Underline (U), Text Color (A with a color swatch), Background Color (brush icon), Bulleted List (≡), and a "More" dropdown. To the right of the toolbar are icons for Link, Image, and Video, followed by an "Insert" dropdown, and "Personalize" and "Advanced" tabs. Below the toolbar is a large text area containing the placeholder text "Enter Text Here".

**26. Directors List Slider Module**

- **Description:** The **Directors List Slider Module** displays company directors' information in an interactive slider format. On hover, users can view detailed information, including profile images, names, positions, and background content. This module allows for easy updates and the addition of multiple directors.
- **Fields:**
  - a. **Profile Image:** Upload a profile image for each director.
  - b. **Name:** Enter the name of the director.
  - c. **Position:** Specify the director's job title or position within the company.

- d. **Background Image:** Upload a background image that enhances the slider's visual appeal.
- e. **Information Content:** Add detailed information about each director, which appears on hover.
- f. **Repeater Functionality:** Enable users to add multiple directors with their respective images and details.
- g. **Slider Settings:** Configure slide transition effects, speed, and navigation options.
- **Usage:** Use the **Directors List Slider Module** to create an engaging way to present company leadership. Ideal for the "About Us" or "Team" pages, this module provides a visually appealing format that allows users to quickly access director profiles while maintaining an organized layout. The hover effect enhances user interaction, encouraging deeper engagement with the content.

**Images:**

## 27. Dual Slider Module

- **Description:** The **Dual Slider Module** presents content in a split-slider format, where one side features a heading and description, while the other showcases slider images. This dual approach allows for a dynamic presentation of visual and textual content, with options for alignment to enhance layout flexibility.
- **Fields:**
  - a. **Slider Heading:** Add a prominent heading for the slider section.
  - b. **Slider Description:** Provide a brief description that complements the heading, giving context to the images.
  - c. **Right Side Images:** Upload or select images that will be displayed in the slider on the right side.
  - d. **Image Alignment Option:** Choose the alignment of the slider content (left or right) to fit the overall page design.
  - e. **Slider Settings:** Configure slider transitions, speed, and navigation options (e.g., arrows, dots).

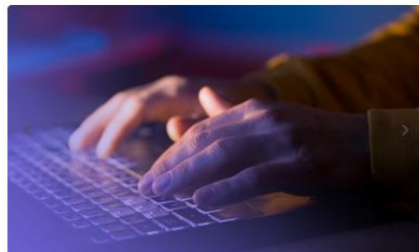

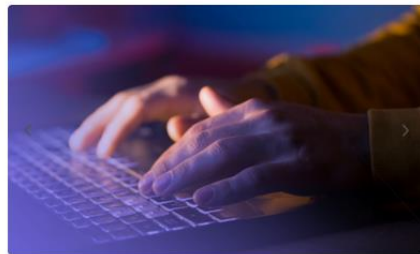

- f. **Styling Options:** Customize fonts, colors, and spacing for the heading and description.
- **Usage:** Use the **Dual Slider Module** to create a visually appealing section that combines text and images in a cohesive layout. Ideal for product showcases, promotional content, or storytelling, this module enables users to engage with both visual and written elements simultaneously, enhancing user experience and interaction.

#### LEFT IMAGE RIGHT CONTENT

At The Higher Pitch, we are dedicated to designing HubSpot themes that empower businesses to create stunning, high-performance websites. Our objective is to offer organizations of all sizes complimentary, user-friendly website themes that enable them to concentrate on growth while ensuring a professional and refined online image.

Transform your staffing approach with a robust online presence that attracts the talent you seek.

## 28. Image List Module

- **Description:** The **Image List Module** allows users to create a visually structured grid of images, each accompanied by a title and a sub-title. This module features a repeater mode, enabling the addition of multiple entries in a seamless grid layout.
- **Fields:**
  - a. **Image Upload:** Upload an image for each item in the list.
  - b. **Title:** Enter a title for each image.
  - c. **Sub-title:** Provide a sub-title to further describe or complement the title.
  - d. **Repeater Functionality:** Enable users to add multiple images, titles, and sub-titles, displaying them in a grid format.

- e. **Grid Layout Settings:** Configure the number of columns and rows to control the overall layout.
- f. **Styling Options:** Customize fonts, colors, spacing, and borders for images and text.
- **Usage:** Use the **Image List Module** to present a collection of images and related text in a clean and organized manner. Ideal for showcasing products, services, team members, or portfolio items, this module enhances visual storytelling while maintaining easy content management through its repeater functionality.

## 29. Image with Form Module

- **Description:** The **Image with Form Module** features a two-column layout in a row, with an image on the left and a form on the right. This module is designed to integrate visual elements with interactive forms, enhancing user engagement and providing a balanced design.
- **Fields:**
  - a. **Left Column (Image):**
    - **Image Upload:** Add an image to display on the left side.
    - **Image Alignment:** Adjust the positioning and sizing of the image within the column.
  - b. **Right Column (Form):**
    - **Form Selection:** Choose or configure the form to be displayed, such as contact, signup, or feedback forms.
    - **Form Styling Options:** Customize form elements, including input fields, buttons, and labels.
  - c. **Column Layout Settings:** Adjust the width ratio between the image and form columns.
  - d. **Styling Options:** Modify overall layout styles, including padding, margins, and background colors.

- **Usage:** Use the **Image with Form Module** to create a visually appealing section that combines imagery with actionable forms, perfect for landing pages, promotional areas, or contact sections. This module enhances user interaction and provides a dynamic approach to capturing leads or engaging visitors.

## Images:

### IMAGE WITH FORM MODULE

The Image with Form Module features a two-column layout in a row, with an image on the left and a form on the right. This module is designed to integrate visual elements with interactive forms, enhancing user engagement and providing a balanced design.

## 30. Join our Team Module

- **Description:** The **Join Our Team Module** is designed for career pages, allowing companies to highlight job opportunities with an engaging layout. The module includes customizable background options, a prominent heading, a descriptive paragraph, and a CTA button that links directly to job listings.
- **Fields:**

- a. **Background Image/Color:** Users can easily update the background with an image or select a color to match the page theme.
  - b. **Heading:** Add a title to introduce the section, encouraging visitors to explore career opportunities.
  - c. **Paragraph:** Provide a brief description or message inviting users to join the team.
  - d. **CTA Button:** A call-to-action button that can be linked directly to the job listings or application page, with customizable text and styles.
  - e. **Styling Options:** Adjust text alignment, fonts, colors, and padding to match the overall design aesthetics.
- **Usage:** Use the **Join Our Team Module** on career pages to effectively promote job openings and attract potential candidates. The customizable design helps create an inviting and professional appearance, encouraging visitors to engage with your company's job opportunities

## Images:

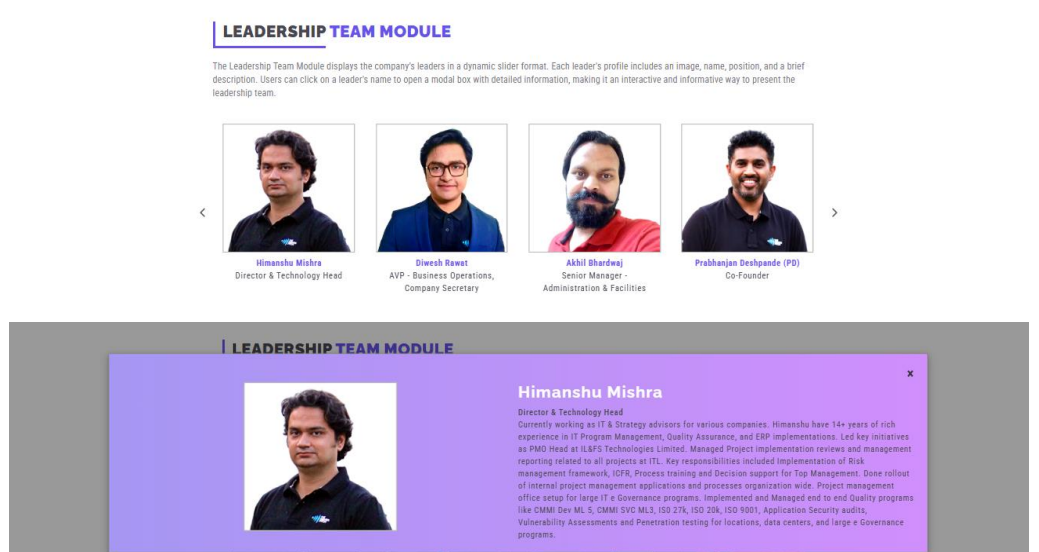

## 31. Leadership Team Module

- **Description:** The **Leadership Team Module** displays the company's leaders in a dynamic slider format. Each leader's profile includes an image, name, position, and a brief description. Users can click on a leader's name to open a modal box with detailed information, making it an interactive and informative way to present the leadership team.
- **Fields:**
  - a. **Profile Image:** Upload the leader's profile picture.
  - b. **Name:** Enter the leader's name, which will be displayed prominently.
  - c. **Position:** Specify the leader's job title or role within the company.
  - d. **Description:** Add a brief description or bio for the leader.
  - e. **Modal Content:** Detailed information shown when clicking on the leader's name, providing further insights into their background and contributions.

- f. **Slider Settings:** Configure the slider display, including navigation arrows, dots, and transition effects.
- g. **Styling Options:** Customize fonts, colors, and layout to match the overall theme of the page.
- **Usage:** Use the **Leadership Team Module** on about pages or team sections to highlight key figures within the company. The interactive slider format allows for an engaging user experience, while the modal feature provides additional depth, giving visitors a closer look at each leader’s background and role.

**Images:**

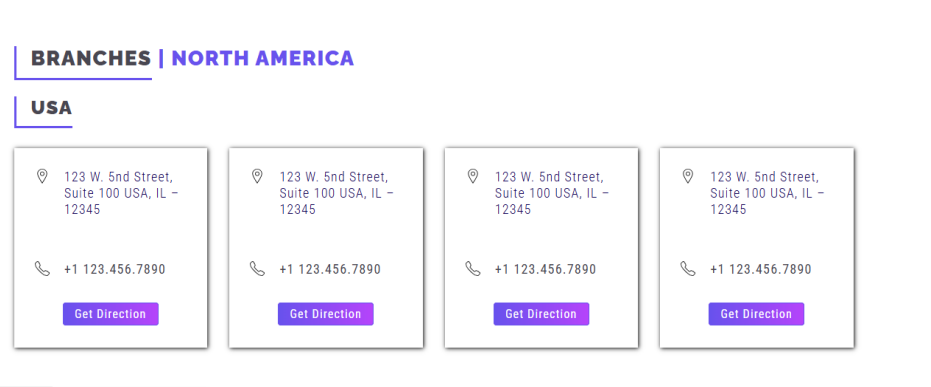

**32. Branches Module**

- **Description:** The **Branches Module** provides a structured way to display the main country branches and their respective locations. Each branch is highlighted with a heading, followed by multiple cards that list specific locations, each accompanied by CTA buttons for easy navigation or action.
- **Fields:**
  - a. **Country Branch Heading:** Enter the name of the country (e.g., North America) to define the main branch.
  - b. **Branch Location Cards:**
    - **Card Title:** Specify the name of each branch location (e.g., USA, CANADA).
    - **Card Description (optional):** Provide additional information about each location.

- **CTA Button:** Add a button for each card that links to relevant actions (e.g., "Learn More," "Contact Us").
- c. **Styling Options:** Customize the appearance of headings, cards, and buttons, including colors, fonts, and layouts.
- **Usage:** Use the **Branches Module** on location or contact pages to effectively display the company's geographical presence. This module enhances user experience by providing clear navigation to separate locations and facilitates easy access to specific branch information or actions.

**Images:**

### 33. Coporate Committee Module

- **Description:** The **Corporate Committee Module** is designed to display various committees within an organization. This module allows for a customizable background color and provides flexibility in presenting committee information through headings and rich text HTML content. Users can easily update or add multiple committee groups as needed.
- **Fields:**
  - Background Color:** A customizable field where users can set the section's background color to match the overall theme or requirements.
  - Committee Group Heading:** Enter a title for each committee group to clearly define its purpose or focus.
  - Rich Text HTML Code Block:** A text area that allows users to input detailed descriptions or information related to the committee, supporting HTML formatting for enhanced presentation.
  - Add Multiple Committee Groups:** Functionality to dynamically add or remove committee groups, allowing users to manage the content as required.

- e. **Styling Options:** Adjust text alignment, font sizes, and other styles to suit the design preferences.
- **Usage:** Utilize the **Corporate Committee Module** on organizational or governance pages to effectively communicate the structure and focus of various committees. The module's customizable elements ensure that the presentation aligns with branding while providing necessary details in an organized manner.

**Images:**

### 34. Corporate Governance Module

- **Description:** The **Corporate Governance Module** is designed to display governance-related content in a structured format. The module features customizable headings and cards that can be used to display governance documents with interactive icons. Each card allows for linking PDF documents that open in a new tab, providing a clear and organized way to present governance information.
- **Fields:**
  - a. **Section Heading:** A customizable field where users can input and easily change the main heading of the section.
  - b. **Cards:**
    - **Icon Image:** Upload an icon to represent the card content visually.
    - **Icon Name:** Enter the name associated with the icon; clicking this name will open the linked PDF document.
    - **PDF Document Upload:** A file upload function that allows users to attach a PDF file, which opens in a new browser tab when clicked.

- c. **Card Layout Options:** Display three cards per row by default, with options to adjust the layout based on content needs.
- d. **Styling Options:** Customize the appearance of headings, icons, and cards to align with branding and design preferences.
- **Usage:** Use the **Corporate Governance Module** on governance or policy pages to present critical documents and information. This module makes it easy for users to navigate and access important governance materials, enhancing the user experience with organized content and interactive features.

**Images:**

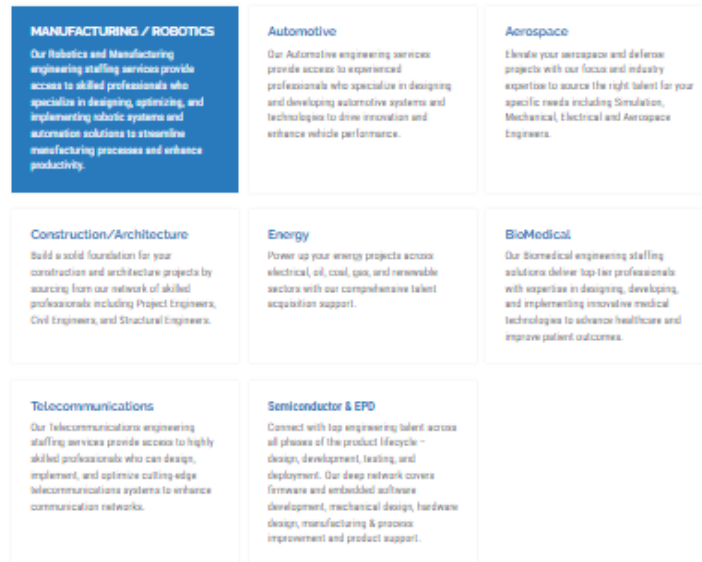

### 35. Multiple Cards Module

- **Description:** The **Multiple Cards Module** allows users to add and display multiple cards in a grid layout, with three cards per row. Each card features a heading and description, with a hover effect that changes the card's color, providing an interactive and visually engaging experience.
- **Fields:**
  - a. **Card Heading:** A text field to input the title of each card.
  - b. **Card Description:** A text area for a brief description or additional details for each card.
  - c. **Card Hover Color:** Customize the color change effect when a card is hovered over.
  - d. **Add Multiple Cards:** Repeater function that allows users to dynamically add, remove, or reorder cards within the module.

- **Usage:** Utilize the **Multiple Cards Module** on pages that require organized content presentation, such as services, features, or team member highlights. The hover color effect enhances user interaction and engagement, making the module suitable for displaying dynamic and informative content.

**Images:**

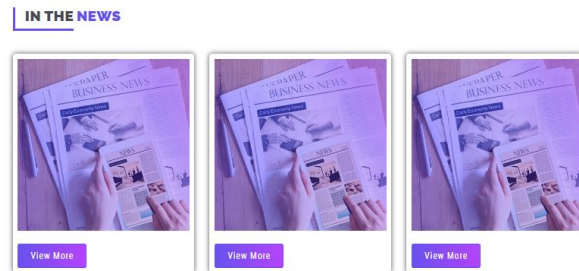

### 36. News Module

- **Description:** The **News Module** is designed to display news items or image-based content in an organized format. The module features a section heading, and each image includes a "View More" CTA button that opens the image in a new tab. The images have a background box shadow for a visually appealing look, and three images are displayed per row.
- **Fields:**
  - Section Heading:** A customizable text field to set the main heading of the news section.
  - Image Upload:** Allows users to upload images to be displayed within the module.
  - "View More" CTA Button:** A button linked to each image that, when clicked, opens the image in a new browser tab.
  - Image Background Box Shadow:** A design feature that adds shadow behind each image to enhance the visual appeal.
  - Repeater Function:** To add, edit, or remove images dynamically, showing three images per row by default.

- **Usage:** Use the **News Module** on pages where you want to highlight news items, featured images, or gallery content. The module's design and interactive "View More" button offer an engaging way to present visuals, making it ideal for news, blogs, or media pages.

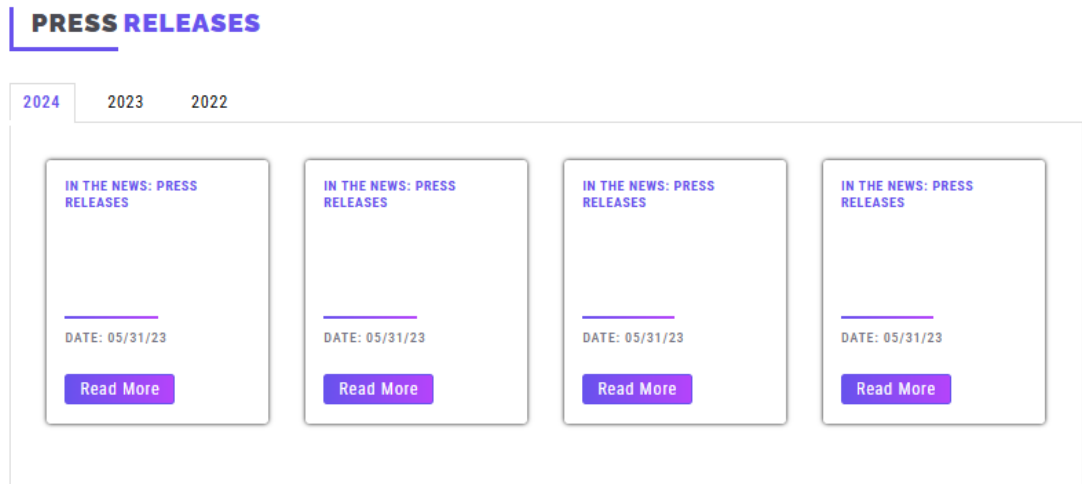

**Images:**

### 37. Press Releases Module

- **Description:** The **Press Releases Module** allows users to display press release content in a tabbed format. Each tab contains cards with press release details, including a name, date, and a "Read More" CTA button. The button is linked to an uploaded document, which opens when clicked.
- **Fields:**
  - a. **Section Heading:** A customizable heading for the press releases section.
  - b. **Tabs Design:** Users can add multiple tabs, change tab names, and organize content into categories.
  - c. **Card Fields:**
    - **Name:** Title or headline of the press release.
    - **Date:** Date of the press release.
    - **Read More CTA Button:** Links to the press release document, which opens in a new tab.
  - d. **File Upload:** Attach documents (PDF, etc.) to the "Read More" button.
- **Usage:** Use this module to display press releases in an organized, tabbed layout. It is suitable for corporate pages where users need to share multiple press releases or documents in a structured and accessible way.

**Images:**

### 38. Snapshot Slider Module

- **Description:** The **Snapshot Slider Module** allows users to display a series of snapshot images in a slider format using the Slick slider. It provides a visually engaging way to display multiple images in a sliding layout.
- **Fields:**
  - a. **Image Upload:** Allows users to upload multiple snapshot images to be displayed in the slider.
  - b. **Slider Settings:** Configuration options for the slider, such as speed, autoplay, navigation arrows, and dots.
  - c. **Caption/Alt Text (Optional):** Add captions or alt text for each image for accessibility and SEO purposes.
- **Usage:** This module is ideal for showcasing photo galleries, project snapshots, or any visual content that benefits from a sliding presentation. It enhances user engagement by providing a dynamic and interactive display of images.

#### Images:

## 39. Tabs Module

- **Description:** The **Tabs Module** allows users to create multiple tabs within a section, enabling content to be organized and displayed interactively. Users can easily add, modify, and switch between tabs, enhancing the user experience with a structured and clean design.
- **Fields:**
  - a. **Tab Title:** Input field to set the title for each tab.
  - b. **Tab Description:** Text area for adding detailed content or descriptions within each tab.
  - c. **Tabs Repeater:** Allows users to add or remove tabs dynamically, creating a customizable number of tabs.
- **Usage:** This module is perfect for organizing content that needs to be separated but displayed within a single section, such as FAQs, product details, service categories, or informational content. Users can switch between tabs to view different sets of information, making the content easily navigable and user-friendly.

### Images:

## 40. List Content Icon Module

- **Description:** The **List Content Icon Module** provides a structured layout with a heading, paragraph, and customizable grid sections containing icons and rich text blocks. It allows users to create visually appealing content sections with various display options.
- **Fields:**
  - a. **Heading:** A text field for adding a section heading, which can be aligned to the center.
  - b. **Paragraph:** A text area for adding a descriptive paragraph under the heading.
  - c. **Grid Layout:** Allows selection of how many content sections (one, two, three, or four) are displayed per row.
  - d. **Icon:** Image or icon field for uploading icons representing each content block.
  - e. **Rich Text Block:** An editable area for adding detailed descriptions or content related to each icon.

- **Usage:** This module is ideal for displaying key features, services, or informational content in a clean and organized format. Users can choose different grid layouts to customize the visual appeal, making it suitable for showcasing highlights, benefits, or instructions in a visually engaging way.

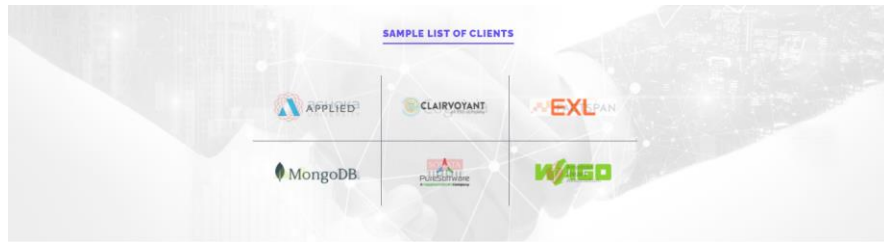

**Images:**

**41. List Of Clients Module**

- **Description:** The **List of Clients Module** displays a collection of client logos or images in a sliding, faded-in animation format. It includes a customizable background image and a heading, allowing users to easily highlight client logos dynamically.
- **Fields:**
  - Heading:** A text field to add a heading above the client images section.
  - Background Image:** An image upload field where users can set or change the background image of the section.
  - Client Images:** A repeater field to add multiple client logos or images, allowing users to upload and manage client visuals dynamically.
  - Animation Settings:** Controls for slide and fade-in effects, providing customization over the animation style and speed.
- **Usage:** This module is perfect for highlighting client logos in a visually engaging manner, adding credibility and highlighting partnerships. The fade-in slide animation enhances the presentation, making it ideal for homepage sections, case studies, or portfolio pages. The easy-to-update image fields allow users to keep the content current and visually appealing.

**Images:**

## 42. Learning Stack Module

- Description:** The **Learning Stack Module** is designed to present educational or informative content with a visually engaging layout. It features a section with a customizable background image, a left-side image, right-side text content, and an additional rich text area for further information, creating a balanced and informative display.
- Fields:**
  - Background Image:** An image upload field to set or change the section's background image, allowing for a tailored visual experience.
  - Left-side Image:** An image field for uploading an image on the left side, enhancing the visual storytelling of the content.
  - Right-side Information:** A rich text or content editor field for inputting descriptive text or information corresponding to the left-side image.
  - Additional Information:** A rich text area below the main content, where users can add extra details, descriptions, or any supplementary content.
- Usage:** This module is ideal for educational pages, informational sections, or displaying content that benefits from a structured layout. It is commonly used in pages like e-learning platforms, product education, or service explanation segments. The dual image and text setup draw the viewer's attention and helps in delivering the information effectively, while the rich text area adds flexibility to include further insights or details as needed.

### Images:

### 43. Success Stories Module

- **Description:** The **Success Stories Module** showcases success stories or blog posts in a grid layout, featuring a visually appealing blog list design. It includes a heading, an image, a blog title, and a customizable CTA button that allows users to link to detailed content, enabling the easy display of multiple success stories or blogs.
- **Fields:**
  - a. **Section Heading:** A text field for adding a heading to the success stories section.
  - b. **Blog Image:** An image upload field for displaying relevant images for each blog or story.
  - c. **Blog Title:** A text field for the title of each success story or blog post.
  - d. **CTA Button:** A button field with URL input options, allowing users to add a link to detailed content or external pages.
  - e. **Grid Layout:** Settings to arrange multiple blogs in a grid format, with options for the number of columns or rows.
- **Usage:** This module is used to display multiple success stories, testimonials, or blog posts in a visually organized grid format. It's perfect for pages that highlight customer achievements, project highlights, or any success narratives that support a brand's credibility. The ability to customize the CTA button URL makes it versatile for directing users to full stories or relevant pages.

#### Images:

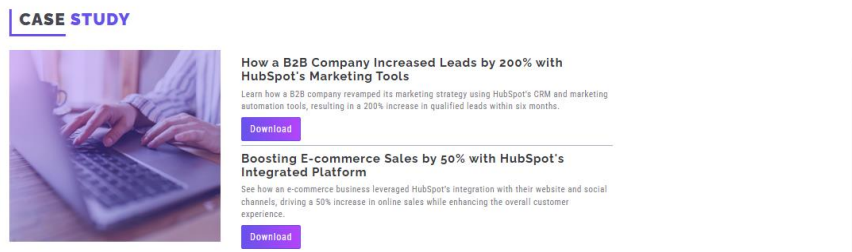

### 44. Download Assets Module

- **Description:** The **Download Assets Module** is designed to facilitate the download of case studies and white papers. It features a visually engaging layout with a heading, an image, and detailed information about the asset. Users

can click a CTA button to open a form in a popup, enabling them to submit their details and receive the asset via email.

- **Fields:**
  - a. **Section Heading:** A text field for entering a prominent heading for the download section.
  - b. **Asset Image:** An image upload field for displaying a relevant image associated with the case study or white paper.
  - c. **Case Study Information:** A rich text field to describe the case study or white paper, including key highlights or summaries.
  - d. **CTA Button:** A button field that opens a form in a popup when clicked, prompting users to fill in their details.
  - e. **Form Fields:** Input fields for user details (e.g., name, email address) that must be filled out to access the download.
- **Usage:** This module is ideal for marketing and educational purposes, allowing organizations to offer downloadable content like case studies and white papers in exchange for user information. By collecting email addresses, businesses can grow their mailing lists while providing valuable resources. The popup form ensures a seamless user experience, allowing users to request the asset without leaving the current page.

#### Images:

## Global Styling

### Custom CSS

The theme includes a global stylesheet (**theme-overrides.css**) for styling the website. To customize the styles:

1. Go to the **CSS** folder in your **Design Manager**.
2. Open **theme-overrides.css**.
3. Modify the styles to match your brand's visual identity.

### Custom JS

You can also add interactivity using the theme's JavaScript file (**main.js**):

1. Go to the **JS** folder in your **Design Manager**.
2. Open **main.js**.
3. Add your custom scripts or modify the existing ones.

## Fonts

Custom fonts are defined in **font.css**. You can add or modify fonts by:

1. Uploading the new font files to the CSS **folder**.
2. Adding font-face rules in the **font.css** file.

## Templates

The **THP Theme** comes with the following templates:

### 1. Home Page Template

- A versatile layout for your homepage with a hero section, services, testimonials, and CTAs.

### 2. About Us Page Template

- Use this to highlight your company's story, mission, and team.

### 3. Case Study Page Template

- The **Case Study Page Template** is designed to highlight detailed client success stories, including project overview, challenges, solutions, and results, with a structured layout for easy readability.

### 4. Content Pages Template

- The **Content Pages Template** enables creating flexible, informative articles easily.

### 5. Contact Us Page Template

- A layout featuring a contact form and your business details.

### 6. Digital Staffing Pages Template

- The **Digital Staffing Pages Template** highlights staffing services, featuring talent solutions and recruitment expertise.

## 7. Investors Pages Template

- The **Investors Pages Template** presents company financials, reports, and shareholder information clearly.

## 8. Newsroom Page Template

- The **Newsroom Page Template** features company news, press releases, and media resources.

## 9. Blog Details Pages Template

- The **Blog Details Pages Template** displays individual blog posts with rich content, comments, and related articles.

## 10. Blog List Page Template

- The **Blog List Page Template** organizes and highlights multiple blog posts for easy navigation and exploration.

## 11. Sitemap Page Template

- The **Sitemap Page Template** provides a structured overview of website content and navigation links.

**Note:** You can find these templates in the **templates/** folder. You can use them as-is or modify them based on your needs.

## Customization

The theme is designed to be highly customizable. Here is how you can adjust different elements:

### 1. Text & Images:

- Use HubSpot's page editor to change text and images dynamically on the frontend.

### 2. CSS & JS:

- Modify the **theme-overrides.css** and **main.js** files to alter the design and behavior of your pages.

### 3. Modules:

- Use the **Design Manager** to customize existing modules or create new ones using the module system in HubSpot.

### 4. Drag & Drop:

- You can drag and drop the available custom modules into any section of your page using the HubSpot page editor.

## Scroll To Top

- **Description:** The **Scroll to Top Rocket Icon Module** is a user-friendly button designed to help users quickly scroll back to the top of the page with a single click. Featuring a rocket icon for visual appeal, this module enhances navigation and improves user experience, especially on long pages.
- **Fields:**
  - a. **Icon Selection:** An option to upload or choose an icon, typically a rocket or other suitable image, to represent the scroll-to-top function.
  - b. **Icon Position:** Settings to customize the position of the button (e.g., bottom-right, bottom-left) on the screen.
  - c. **Scroll Speed:** An adjustable setting that determines how quickly the page scrolls back to the top when the button is clicked.
  - d. **Hover Effects:** Optional styling settings to add hover effects or animations to the icon for better user engagement.
  - e. **Visibility Settings:** Controls to determine when the button appears (e.g., after scrolling a certain distance).
- **Usage:** This module is used to enhance website usability by providing a quick way for visitors to navigate back to the top of the page, which is particularly useful for pages with extensive content. The rocket icon adds a playful and modern touch, making the interaction more engaging. Users can easily configure the icon style, position, and behavior to match the overall theme of the website, ensuring consistent design aesthetics.

## FAQ

### 1. How do I add a new section to my template?

You can easily add a new section by dragging and dropping any module (custom or built-in) into your page layout via the HubSpot page editor.

### 2. Can I use my own fonts?

Yes, you can upload your own fonts in the **Fonts** folder and define them in **font.css**.

### 3. How do I update the theme's colors?

Modify the global CSS variables in **theme-overrides.css** to quickly update the color scheme.

## Support
